

Seeing is believing

Intelligent Design for Advanced Cleaning

Deep wet cleaning with all the benefits you would expect from a dry cleaning system.

The Texatherm Cleaning System is a patented process combining a unique chemical technology with heat, agitation and reaction between two solutions. The process produces a capillary action which safely deep wet cleans carpets but also delivers all the benefits normally only associated with dry cleaning systems.

- Dry in only 30 minutes
- Cleans, disinfects and applies anti-static coating
- Safe for use on wool carpets
- Guaranteed not to stretch, shrink or split seams
- Low moisture and noise levels
- Up to 60% reduction in cleaning time
- Leaves no resoiling sticky residues
- Environmentally friendly
- pH neutral carpet on completion
