### Determination of basic bactericidal activity

Laboratory	Microtech Services (Wessex) Ltd	
Reference	98163	
Report Number	R 98163/1	Page 1 of 1

### Identification of the sample

Name of Product	DioCleanse
Reference	CM323
Batch No.	L22102
Manufacturer	
Date of delivery	29.6.00
Storage conditions	Ambient
Product diluent recommended by manufacturer for use	None
Active substance	Not indicated

### Experimental conditions

Period of analysis	12.7.00 – 14.7.00
Test temperature	20 ± 1°C
Test concentration	1:20
Contact time	1 minute
Counting procedure	Membrane filtration
Temperature of incubation	30 ± 1°C

### Procedure for validation of test conditions

Neutralization medium                      Membrane filtration

### Test results

The product is bactericidal when used at a dilution of 1:20 against *Pseudomonas aeruginosa* NCTC 10662, *Staphylococcus aureus* NCTC 6571, *Escherichia coli* NCTC 10418, and *Saccharomyces cerevisiae* NCPF 3178 after 1 minute.

### Conclusion

The product possesses bactericidal activity under the conditions described in BS EN 1040.
